PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience building responsive, scalable, and database-driven web applications using MongoDB, Express.js, React.js, and Node.js. Experienced in developing reusable React components, RESTful APIs, authentication systems, form validation, API integration, and responsive UI/UX. Gained practical industry experience through Full Stack development internships at Innovation City Free Zone Authority, UAE, and Skillmate.ai. Experienced in integrating AI capabilities into web applications using OpenAI and Claude APIs, with a strong focus on clean, maintainable, and production-oriented development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Framer Motion, Context API

Backend: Node.js, Express.js, RESTful APIs, Middleware, MVC Architecture

Database: MongoDB, Mongoose, Firebase Firestore

Authentication & Security: Firebase Authentication, Google OAuth, JWT, OAuth 2.0, Role-Based Access Control

API & Integration: REST API Integration, CRUD Operations, API Validation, Error Handling

Cloud & Services: Firebase, Cloudinary, Nodemailer, Vercel, Render

AI Integration: OpenAI API, Claude API, Puter.js, Prompt Engineering

Tools: Git, GitHub, Postman, VS Code

PROFESSIONAL EXPERIENCE

Tech & AI Intern - Innovation City Free Zone Authority, UAE

June 2026 – July 2026

AI LaunchKit

- Contributed to AI LaunchKit, an AI-powered platform helping business license holders establish their online presence.
- Worked on a workflow using business registration information to generate customized websites through AI.
- Developed responsive frontend interfaces using React.js and Tailwind CSS.
- Integrated APIs and contributed to data-driven application workflows.
- Performed frontend testing, debugging, and UI improvements.

Full Stack Developer Intern — Skillmate.ai

August 2024 – September 2024

- Developed Brand Registration and Brand Registration Success pages using React.js and Tailwind CSS
- Built Register Form and Registration Success pages with dynamic form handling and validation
- Collaborated with the backend team to integrate APIs and optimize data flow using MongoDB, Express.js, and Node.js
- Enhanced UI/UX through responsive design, Framer Motion animations, and accessibility improvements
- Contributed to application performance optimization for faster loading and better user experience
- Used GitHub for version control and collaborative development

PROJECTS

FounderAI — AI-Powered Free Zone Recommendation Platform

React.js · Tailwind CSS · Node.js · Express.js · MongoDB · OpenAI API

- Built a full-stack AI-powered platform with a single-page dashboard for processing business data through the OpenAI API.
- Integrated OpenAI API to generate context-aware business recommendations based on user requirements.
- Developed RESTful APIs using Node.js and Express.js with authentication, validation, and error-handling middleware.
- Built responsive React.js and Tailwind CSS interfaces with dynamic forms and API-driven data rendering.
- Designed MongoDB schemas using Mongoose for structured data storage and retrieval.

Campus Lost & Found System — Freelance Client Project

React.js · Tailwind CSS · Material UI · Node.js · Express.js · MongoDB · Firebase · Cloudinary · Nodemailer

- Built a MERN-based Lost & Found platform covering four core application areas: Home, Profile, Lost Items/Post, and Admin.
- Implemented workflows for reporting lost and found items with descriptions, details, and images.
- Developed advanced search and filtering functionality.
- Built an Admin Dashboard for post verification, management, and resolution workflows.
- Integrated Firebase Authentication and Google OAuth for secure user access.
- Used Cloudinary for image storage and Nodemailer for email notifications.

MERN E-Commerce Platform

React.js · Tailwind CSS · Node.js · Express.js · MongoDB · Firebase · Razorpay

- Built a full-stack e-commerce platform covering 10+ user and admin screens/workflows.
- Implemented product browsing, search, filtering, cart management, and order tracking.
- Integrated Razorpay for payment processing and Firebase Authentication for secure access.
- Implemented Admin/User Role-Based Access Control (RBAC) and an Admin Dashboard.
- Built RESTful APIs for product, user, cart, and order operations using Node.js and Express.js.
- Used MongoDB aggregation pipelines for admin-side analytics.

EDUCATION

Master of Computer Applications (MCA)

Karpagam Academy of Higher Education, Coimbatore | 2023 – 2025

CERTIFICATIONS

- AI for All Program — Intel & Digital India
- AI Vibe Coding Workshop - EMC
- Artificial Intelligence and Data Analytics — NoviTech
- Python Full Stack Development - Guru Tech
- Basics of Python — UniAthena
- DSA for Beginners — Kaashiv InfoTech
- Fundamentals of Web Development Program - Udemy
- Java & Python Programming Mastery — Udemy
- JavaScript and PHP Programming Course - Udemy
- JavaScript Application Programming — Udemy
- Mastering Python — Infosys Springboard
- MERN Full Stack Development — EMC
- Namaste JavaScript — Namaste.dev
- React JavaScript — Udemy
- SQL — Udemy
- Additional Certifications
- Python Full Stack Development - Gurutech
- Introduction to AI and Agents — Microsoft
- Claude Code in Action — Anthropic
